management of fina marks in one excel sheet per exam
se first exam 1 excel sheet
we put all together in a separate grid overview
more expected less expected

future process

i would

integration stage may be cumbersome
1

combined sheet breaks
lightweight process to put everzthing together

in the future
a db better /
big advantage
for the handlers of the exams
emplyees of se group

structured problems visible from dashboard

factors impact the overall performance
the bottleneck
effort involved ?

critical issues there
what issues our application shold resolve
not a pure web app! may reduce usefulness
potential factors

tailor made analysis
make it easier for the user to analyze data
export in exce sheet!!! important

what kind of analysis
we edit some data field to the grade overview
excel - simple
adding a column in excel is easy
should not be more complicated
would the tool be a collector tool and main handling will be in excel
or standard purposes and interactions through the tool

import export
switch fluently between both is important issue

major concern - maintainability
what if someone leaves
at any point to come back not to lose data!
structuring

button download archive !

there is actually a template

clear regulations on how things should look like
people may deviate with excel

people are asked to clean their mess up

if integrate with additional groups
way more complicated problem
first look within se group

publication

AT
NE

in time progress
2 unsucsesfull attempts / bad stuff

refine how succ stud

matrik name sur first semester nr of exams avg course 1 course 2

ad hoc
distribution marks relative to countries
marks relative to student years

did we have special cases
normal ects intake

give me all the data of the excel sheet and we have the analysis

metadata of students

1 table per exam

copying together stage

arbitrary data goes in a

meaningful dataset for students

10 credits /> idk if the student performs well

se can use own data

are there issues for x grup of students
become nbetter identifz prospective students who have a good chance
exploratory

added country
pair this data with the data of the applied portal
this goes well beyond what we already have

exam data only

se a lot of stuff is mandatory
courses 60 ppl signed up
1 week 20
realistically doing a bit

mapping if the student did courses in x semester

do people put enough effort to be in exam

rely heavily of excel??

out of scope exam sheets?????

general data acquisition

drag and drop
copy paste

if an upload is accepted, if there are issues
incorrectness of data, it shoold be flagged

grades overview
