Software Systems Engineering
University of Hildesheim

sse.uni-hildesheim.de

The topic: Exam Grades

- Over 100 individual exams per semester
  - Over 15 different Software Engineering courses
  - Most of them have 2 exams per year
- Statistical overviews that are interesting for us:
  - Aggregated results (e.g. passing rate) for a given course over time
  - Overview of the study progress for our SE master students
  - …
- Current state: multiple Excel sheets…

About the project

Why is it interesting?

- Green-field development
- Result will be used by us and helps us improves the study program

Technologies

- Web development
- Database

What is needed

- Create a future-proof database schema
  - Data integrity is most important quality requirement
  - Interviews with customer
- Create a user friendly data input workflow
  - Prevent errors when inputting new data
- Write maintainable code
  - If we cannot maintain it after the project is over, we cannot use it

What is expected of you

Experience

- Databases
- Web technologies
